TSV Bangkok 2026 — Install App

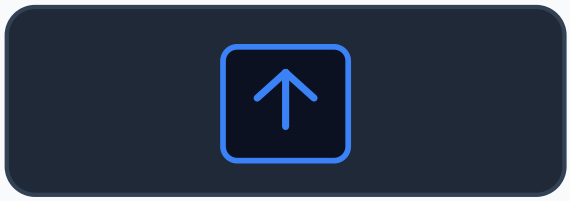
Add the PWA to your home screen · GKSCSC Thailand Study Visit · 26–30 Apr 2026

OPEN THIS LINK ON YOUR PHONE
https://57wbs1.github.io/TSV/

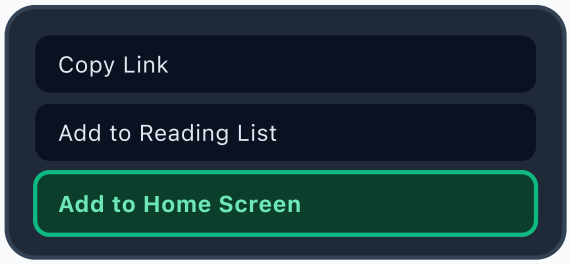
iPhone (iOS)

Use Safari — not Chrome, not from inside Telegram. Only Safari can install PWAs on iOS.

1. **Tap the Share button**
   Bottom centre of Safari — the square with an up-arrow.



2. **Scroll down → Add to Home Screen**
   In the share sheet, swipe up on the grid of actions. Look for the icon with a ＋ .

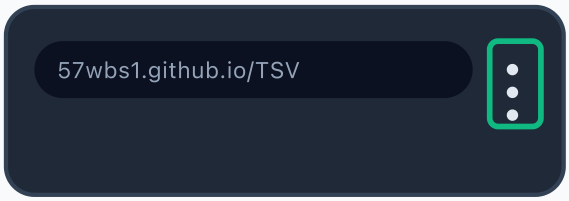


3. **Tap Add top right**
   Icon lands on your home screen. Tap it to launch full-screen. Sign in once with your 4-digit PIN.

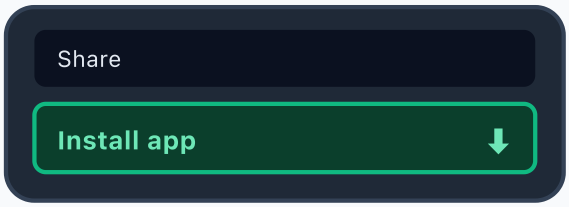
Android

Use **Chrome** (default browser works too — Samsung Internet, Edge all fine).

1. **Tap the ⋮ menu top right**
   Three vertical dots next to the address bar.



2. **Tap Install app or Add to Home screen**
   One of these will appear. Chrome may also auto-prompt you with a banner.



3. **Confirm Install**
   App icon appears on your home screen. Launching from the icon runs it full-screen with offline support.

Quick FAQ

Why install? Isn't opening the link enough?

Installing runs the app full-screen (no browser UI), launches faster, and works offline — your status updates will queue and sync when you're back online.

My PIN is 0000 by default

Change it after your first login via Settings → Account → Change PIN.

Location permission — why does it ask?

Only used when you tap "Leaving Hotel" so your buddies and the duty officer can see you on the map. You can deny it and still use the app; location just won't auto-capture.

Telegram notifications?

The bot sends automated reminders (0600H weather, 1900H preview, 2300H SITREP, 0200H curfew). You'll receive them in your syndicate's Telegram group — no setup needed.
